### **U.S. DEPARTMENT OF TRANSPORTATION SELECTS CENTECH FOR ENTERPRISE IT SUPPORT SERVICES**

Falls Church, Virginia, September 29, 2009 – This week, the U.S. Department of Transportation (DoT), National Highway Traffic Safety Administration (NHTSA) awarded their multi-million, six year Enterprise Information Technology (IT) Support Services contract to THE CENTECH GROUP, Inc. (CENTECH) under the General Services Administration's (GSA's) Commerce Information Technology Solutions (COMMITTS) Next Generation Government-wide Acquisition Contract (GWAC).

CENTECH is a prime on the COMMITTS GWAC and will lead teaming partners Daston Corporation and Phase One Consulting Group under the name Team CENTECH on the time and materials contract that starts immediately and will run through the end of September 2015 if all options are exercised.

The NHTSA contract involves the planning and implementation of improvements to mission systems, in compliance with the multitude of security and investment control mandates, while providing quick response on Tier 3 help desk referrals. Team CENTECH will provide the knowledge, skills and abilities to perform a host of specified, implied and essential tasks that are critical to the success of establishing appropriate policies, plans and controls to ensure the effective management of federal IT investments and resources.

“CENTECH is committed to supporting NHTSA’s mission as the leading source of accurate and complete traffic safety information for the American people, and advancing its mission to reduce deaths, injuries and economic losses resulting from motor vehicle use,” said CENTECH President and Chief Executive Officer, Fernando V. Galaviz. “We and our trusted teaming partners understand the environment and the technical issues and concerns of DoT and NHTSA, as well as the full range of underlying technologies to support mission applications. Throughout our bid on this project, we were able to demonstrate this understanding. It will help us decrease both transition time and risks thereby conserving government resources and taxpayer dollars.”

Team CENTECH will launch their 90 day phase-in transition on October 1, 2009 with the support of CENTECH corporate management and their Quality Assurance, Human Resources and Contracts Department team members (employees). As they have on other contracts, CENTECH corporate management expects to retain over 90 percent of those incumbent employees identified by the client in order to reduce and mitigate the systemic risks to costs and timelines associated with all project management changes.

THE CENTECH GROUP, Inc. is a performance-based service contractor with program management expertise that specializes in systems and service solutions for federal, military and civilian programs. Since 1988, CENTECH has been a proven, successful provider of systems and solutions on over 4000 federal government contracts/task orders and 150 mission critical software development projects. Operating under the principles of Trust, Quality, Service and Value, CENTECH is ISO 9001:2000 certified and CMMI Maturity Level 3 appraised. The organization’s technical capabilities include business operations support, engineering services, computer data center operations, help desk systems and services, training/knowledge transfer systems and services, logistics support systems and services, network and infrastructure services, program and acquisition management support services, security systems and services, software development and maintenance, systems engineering/technical assistance, test and evaluation services and Web solutions and services.
